1.0 ISSUER PROFILE

Profile and business model

Isagro S.p.A. (hereinafter also “Isagro”, the “Company”, the “Issuer”) is the parent company of a Group that has become a highly qualified global operator in the agrochemical sector. Through a system of strategic partnerships and acquisitions and a product portfolio covering the safeguarding and nutrition of crops, the Group now operates in around 80 (eighty) countries, divided into four main macro geographical areas: Europe, the Americas, Asia and Rest of the World.

Established in 1993 and listed on the Milan Stock Exchange since 2003, Isagro is the only Italian company in the sector that makes direct investments in new molecules and in the development of active ingredients with a low environmental impact.

Isagro is active in innovative research, development, production and marketing at global level of proprietary medicinal products for agriculture, as well as their distribution on the major markets. The Group performs its production in 5 (five) locations, 4 (four) in Italy and 1 (one) in India, and distributes directly, proprietary as well as third party products, in Brazil, Colombia, India, Spain and in the United States. In other countries, it operates through important local partners.

During last years, this business model (“*Global Independent Originator*”) has been further strengthened by the development of a new business area focused on the promotion and exploitation of the Group’s intellectual properties: to this end, along with its core activities for the production and sale of proprietary products to third party distributors, Isagro pursues the optimisation of proprietary active ingredients and consequently it has positioned itself in the market also as a provider to third parties of the aforementioned active ingredient in order to mix them with the third parties’ products.

The Company’s main strength is its capacity to identify and patent new agropharmaceuticals products, together with the know-how and experience in performing the assessments that are required for defining their toxicology and efficacy profile. In order to fund the development of research-originated products, during 2014 the Company launched a share capital increase operation based on a new category of shares, called *Azioni Sviluppo* (Growth Shares), listed on the Milan Stock Exchange and devised by the Chairman and CEO of the Group.

For a detailed analysis of the main events occurred in 2017, see the Management Report on the Financial Statements as at December 31st, 2017.

Mission and ethical values

Isagro’s mission mainly consists in offering farmers innovative chemical and biological based tools for the health of their crops, which are safe for the environment, users and consumers of agricultural products.

At the hearth of Isagro strategic and innovative projects, are farmers and farms with their need to satisfy the food chain with high quality products. Isagro ambition is to guarantee food safety by exploiting the planet’s resources sustainably: a larger production in a better way.

Isagro refers to the ethical principles set forth in the Group Code of Ethics, upon which its models of conduct are based in seeking to compete effectively on the market, improve its customer satisfaction levels, increase the value for its shareholders, develop the skills and promote the professional growth of its employees.

Governance Model

The corporate governance system adopted by Isagro is structured in accordance with the traditional model and complies with the principles set forth in the Corporate Governance Code.

The Company's governance system consists of the Shareholders' Meeting, a Management Board - the Board of Directors - and a Supervisory Board external to the Board of Directors - the Board of Statutory Auditors. The statutory audit on the Company's accounts is done by an independent auditor appointed by the Shareholders' Meeting on recommendation of the Board of Statutory Auditors.

The Board of Directors has established two internal committees, which provide consulting support and submit proposals: the Nomination and Remuneration Committee and the Control and Risk Committee, both composed of independent directors.

In addition to the above-mentioned, there are also the following governing/monitoring bodies:

- the Executive Director Responsible for the Internal Control and Risk Management System, position covered by the Chairman and CEO;
- the Lead Independent Director, appointed in compliance with criterion 2.C.3. of the Code;
- the Manager responsible for preparing the corporate accounting documents, position covered by the Company's Chief Financial Officer;
- the Risk Manager, position covered by the Company's Q&HSE Manager;
- the Internal Audit Manager;
- Corporate and Legal Affairs Managers, actively engaged in governance and compliance matters;
- the Related-Party Transactions Committee (composed by Independent Directors), established according to the Consob regulation on transactions with related parties;
- the Supervisory Body adopted by the Board of Directors in accordance with the requirements of the Italian Legislative Decree No. 231/2001.

The Governance Model of Isagro S.p.A. is based on a set of rules, principles and procedures periodically updated according to legislation and best practice.

Corporate Social Responsibility

Since 2002, Isagro publishes a Social-Environmental Report, that since 2008 has become Environmental Report on its website (www.isagro.com). This Report is a way to inform the market on the results of Isagro's commitment in terms of improving environmental impact and protecting the health and safety of employees and the local communities in which its plants are located.

In accordance with the EU Directive 2014/95 on "Non Financial Information", implemented through Legislative Decree 254/2016, Isagro has developed a targeted non-financial reporting approach based

on recognized reporting standards ("GRI Sustainability Reporting Standards", published by the Global Reporting Initiative according to Core approach).

In compliance with the above, since 2016, Isagro prepares a "Non-Financial Statement" of the companies belonging to the Group, describing the initiatives and the main results in terms of sustainability performance achieved during the reference period.

The "Non-Financial Statement" prepared as of December 31st, 2017 has been subjected to limited assurance by the Auditing Firm Deloitte & Touche, and to the approval of the Board of Directors of Isagro S.p.A. on March 13th, 2018 and will be brought to the attention of the Shareholders' Meeting on April 24th, 2018.

Environment, quality and safety are Isagro's founding values. Indeed Isagro participates in the *Responsible Care* voluntary programme coordinated by all national chemical industry federations, created as a driver for a continuous adaptation of the industrial activities to the growing needs for safety and environmental protection, and at the same time, for the commitment to the communication of the achieved results, towards continuous, tangible and significant improvement. Isagro is also a member of the *Fondazione Sodalitas*, Italian partner to the European Commission's lead contact network, *Corporate Social Responsibility Europe*. *Fondazione Sodalitas* is committed to implementing the new European Union strategy on Corporate Social Responsibility in Italy.

The agreement between Holdisa shareholders, signed on July 30th, 2013 (and subsequently updated and amended) covers shares representing the entire capital of Holdisa, with registered office at Via Caldera 21, Milan. Following the execution of the transactions envisaged in the framework agreement regarding the entry of Gowan in the Isagro control chain, Holdisa holds the majority of Isagro shares with voting rights. It is stated that:

- agreements on amendments to the Articles of Association and membership of the corporate bodies of Manisa (formerly the parent company of Holdisa) and Holdisa (article 122, paragraph 1 of the Consolidated Financial Law) are outdated following the merger between the two companies in 2014;
- the covenant on amendment to the Articles of Association of Isagro regarding the introduction of a provision providing the Shareholders' Meeting approval pursuant to article 2364, no. 5), c.c. for some specific asset divestments (article 122, paragraph 1 of the Consolidated Financial Law), at the date of this Report, has been exercised;
- agreements on the possible transformation of Holdisa into a limited company (article 122, paragraph 1 of the Consolidated Financial Law), at the date of this Report, are outdated by deadline.

The framework agreement specifically provides that Piemme will retain control of Isagro. The duration of the agreement is different in relation to the above points, but in any event, no withdrawal from the agreement is provided prior to its expiry.

g2) Piemme and Gowan shareholders' agreement

The agreement was signed on October 18th, 2013 (and subsequently updated and amended) by the shareholders of Piemme and Gowan LLC, which holds 0.50% of Piemme share capital.

- (b) the remaining directors shall be drawn from other lists; for this purpose, the votes obtained by each of the lists are to be divided by one, two, three, and so on, depending on the number of directors to be appointed. The quotients obtained in this way shall then be progressively assigned to the candidates on each list, in their order of appearance. The candidates are then to be ranked on a single list on the basis of the quotients assigned them, in decreasing order. The candidates with the highest quotients shall be appointed. Where more than one list obtains the same number of votes, the shareholders present at the meeting shall vote between said lists. The candidate elected on the list obtaining a simple majority of votes shall be appointed. In any case, at least one of the Members of the Board of Directors is taken from the minority list obtaining the most votes and in no way connected, not even indirectly, to the shareholders that presented or voted on the list that came first in terms of number of votes²;
- (c) if, as a result of the procedure referred to in points a) and b) above, is not guaranteed:
 - the Board membership in compliance with the current *pro tempore* regulations on gender balance, the candidate belonging to the most represented gender elected as the last in

² Isagro's Articles of Association does not provide a percentage of votes equal to at least half of that one required by the same for the submission of minority list (compare to article 147-ter, paragraph 1, TUF).

- progressive order in the list achieving most votes will be replaced by the first candidate from the minority gender included on that same list but not yet elected. A similar replacement will also be made in other lists achieving the election of at least one candidate, in decreasing order of the number of votes achieved, until the Board membership complies with the *pro tempore* current regulations on gender balance;
- a number of independent directors equal to at least the minimum number required by article 147-ter, paragraph 4 of Legislative Decree No. 58/1998, is not appointed, with respect to the overall number of directors, the non-independent candidate appointed as the last in progressive order in the list with the highest number of votes out of those that have achieved the election of at least one candidate but have not yet appointed at least one independent director, will be replaced by the first independent candidate on that list thus far not elected. A similar replacement will take place in the list that comes second in terms of number of votes among those that achieved the election of at least one candidate but have not yet appointed at least one independent director, if necessary to ensure appointment of the minimum number of independent directors;
- (d) finally, if the procedure referred to in point c) above fails to ensure compliance with the *pro tempore* current regulations on gender balance and/or on the minimum number of independent directors, the Shareholders' Meeting will take place with the legal majority to appoint the missing directors subject to the presentation of candidatures of persons satisfying the necessary requisites. For the appointment of the directors outside the renewal of the entire Board of Directors, or where a single list or no list is submitted, the Shareholders' Meeting resolves with the legal majority and the above procedures do not need to be observed, in compliance with the *pro tempore* provisions in force on balance between genders and/or on the minimum number of independent directors. If one or more directors terminate office during the year, arrangements will be made pursuant to article 2386 of the Italian Civil Code and in compliance with the *pro tempore* current regulations on gender balance and/or on the minimum number of independent directors.

Pursuant to article 16 of Articles of Association, if the resignation or other reasons result in termination of the majority of directors, the entire Board shall be considered to have resigned and a Shareholders' Meeting must be called without delay to appoint all directors.

Pursuant to article 17 of the Articles of Association, unless arranged by the Shareholders' Meeting, the Board of Directors will elect a Chairman among its members and may appoint one or more Vice Chairmen and a Secretary, who does not need to be a director or a shareholder.

Succession plans

Considering the ownership structure and the fact that the only two executive directors have specular delegations, the Board of Directors has not so far assessed any succession plans for executive directors. Moreover, the Board of Directors, during the meeting of February 21st, 2018, discussed about succession plans and deemed appropriate to postpone to future meetings any decision about the opportunity to adopt, according to timing and methods considered most appropriate, a plan for the succession of executive directors that provides special mechanisms to be adopted for early replacement, i.e. prior to the natural expiry of the office, identifying the corporate bodies and parties involved in such activities.

Diversity policies

With regard to the diversity policies applied in relation to the composition of the administrative and control bodies, the issue is monitored as the composition of the Board of Directors and the Board of Statutory Auditors is adequately diversified by age, by gender and by educational and professional career, as well as by nationality, as can be seen from the above, as well as from the curricula.

In addition, as part of the Board Evaluation process carried out during the reference period, a rather high evaluation of the "Diversity" emerged, demonstrating an almost unanimous opinion about the adequate composition of the above-mentioned bodies.

At this regard, the Board of Directors did not consider formalize the approval of a specific policy as necessary.

Maximum number of assignments in other companies

Directors of the Issuer accept appointment to the Board when they believe they can dedicate the time necessary to perform their duties diligently, compatibly with the number and nature of other assignments they may hold. It is the practice of the Board to request disclosure from all its members of any offices they hold as directors or statutory auditors in other companies listed on regulated markets (also foreign), financial companies, banks, insurance companies or large companies as identified by criterion 1.C.2. of the Code.

In compliance with the recommendations of criterion 1.C.3. of the Code, the Board of Directors, by resolution carried on August 4th, 2015 and with the approval of the Board of Statutory Auditors, set a maximum number on the assignments that directors may hold compatibly with the diligent performance of the office of Company director, also taking into account Directors' participation in Board committees. The number of appointments that directors may hold as directors or statutory auditors in other companies listed on regulated markets (including foreign ones), financial companies, banks, insurance companies or large-sized companies is a total of 5 (five).

The current membership of the Board complies with the aforementioned criteria.

Induction Programme

The organisation and contents of Board of Directors' meetings, as well as the attendance of Committee meetings, guarantee constant updating of the directors and statutory auditors as regards the Company's performance and the reference market.

In particular, during the Board of Directors meetings the Chairman and Chief Executive Officer, provides to illustrate the main business issues to better understand the Company and the Group performance. He also provides Board members with continuous information about the main sector regulatory framework updates and their impact on the Company business. Also regarding the principles of proper risk management, during the meetings of the Board of Directors, Chairman and Chief Executive Officer asks for further insights, if deemed appropriate, with the support of the Control and Risk Committee and of the Risk Manager.

Moreover, in accordance with the provisions of criterion 1.C.6. of the Code, upon Chairman invitation, certain Company's executives attend the Board meetings in order to provide appropriate supplemental information on the items on the Board agenda.

The promptness and completeness of pre-meeting information are guaranteed by the Corporate Affairs department of the Company, which in coordination with and supported by the company departments concerned, ensures all necessary documents are prepared as required for discussion of the items on the agenda. Transmission of these documents to Directors and Statutory Auditors is arranged by the Secretary of the Board of Directors, who takes care to prepare them reasonably in advance before the meeting date, also taking into account any confidentiality and urgency requirements in connection with certain topics. The Board considers that, in most cases, the documentation on items on the agenda should be transmitted to Directors and Statutory Auditors at least 2 (two) business days before the meeting date. Complex documents or those relating to significant transactions must be sent at least 3 (three) business days before the meeting date.

The Board considers that these criteria were normally complied with during the year ended December 31st, 2017. In case, for organisational or confidentiality reasons, it is not possible or appropriate to transmit documentation before the meeting date in accordance with the above deadlines, the documents are handed out at the meeting itself, while in other cases the information must be supplemented during the board meeting.

In addition, the Chairman of the Board of Directors ensures that time for discussion of the agenda topics' is sufficient to allow constructive debate and, during the meetings, encourages contributions from Directors.

As standard practice, persons external to the Board are invited to the Board of Directors' meetings, in particular Executives and/or Managers of Company departments with specific responsibilities and skills on issues discussed by the Board of Directors, in compliance with the provisions of criterion 1.C.6. of the Corporate Governance Code.

4.6 INDEPENDENT DIRECTORS

The Board of Directors, with reference to each Board member and on an annual basis, performs an assessment on the possession of independence requisites, also based on information provided by the directors, and discloses the results to the market.

We highlight that 3 (three) non-executive directors, namely Enrica Maria Ghia, Adriana Silvia Sartor and Stavros Sionis, are qualified as 'independent' directors in accordance with article 3 of the Corporate Governance Code and article 144-*novies* of the Consob Regulation on Issuers.

The independence of the independent directors was assessed by the Board of Directors during the meeting of May 5th, 2015, following their appointment at the Shareholders' Meeting of April 24th, 2015. It is stated that the independence of the director Enrica Maria Ghia was evaluated by the Board of Directors on May 16th, 2016, following her appointment at the Shareholders' Meeting of April 28th, 2016. The results of the assessments were disclosed to the market by means of a press release sent to the Italian Stock Exchange in accordance with the Consob Regulation terms and conditions.

In performing its assessment as to whether independence requirements were met, the Board of Directors applied all the criteria envisaged in the Code.

The persisting characteristics of independence for the directors was verified by the Board of Directors of the Issuer, adopting the parameters of article 3 of the Code and duly disclosed to the market, during the meeting of March 1st, 2017 based on the declarations made by the individuals concerned supported by related documents.

In accordance with criterion 3.C.5. of the Code, after the Board of Directors' verifications, the Board of Statutory Auditors confirmed the correct application of the procedures adopted by the Board of Directors for assessing the independence of its members. The results of these verifications are described in the Board of Statutory Auditor's Report to the Shareholders Meeting.

In 2017 the independent directors met 3 (three) times, in the absence of the other directors and coordinated by the Lead Independent Director, mainly to assess and analyze the following matters:

- examination and discussion of the Company's market and with in-depth analysis on its competitors;
- the update of Related Parties Transactions procedure;
- the analysis of the new governance criteria of the Group aimed at direct operational oversight of the subsidiaries by Isagro S.p.A.;
- the evaluation of the proposals for external consultancy regarding the activities of the Board Evaluation and Board Review;
- the discussion on the results raised from the Board Evaluation assessment;
- the evaluation and understanding of the information useful to perform the role of the independent directors and a self-assessment on the contribution that they can make within the Board.

It should be emphasized that the directors, qualified as independent, are committed through declarations signed by each one to promptly inform the Board if any situation arises that inhibits their office and about any change to the aforementioned declarations during their term of office.

4.7 LEAD INDEPENDENT DIRECTOR

In accordance with criterion 2.C.3. of the Corporate Governance Code, considering that the plurality of offices of the Chairman of the Board of Directors and CEO are held by the Executive Director, Giorgio Basile, the Board of Directors, by resolution of May 5th, 2015, appointed the independent director Stavros Sionis as Lead Independent Director.

This decision stems from the need to identify the Lead Independent Director, pursuant to criterion 2.C.4. of the Corporate Governance Code, as a point of reference and coordination for the issues and contributions of non-executive directors, having regard to those of independent directors. The Lead Independent Director co-operates with the Chairman to guarantee that the directors receive full and prompt information. The Lead Independent Director is also vested with the power, either independently or at the request of other Board Members, to call special meetings of sole independent directors in order to discuss issues judged to be of interest with respect to the functions of the Board of Directors or to the management of the Company.

With reference to the main activities carried out by the Lead Independent Director refer to the previous paragraph.

5.0 TREATMENT OF CORPORATE INFORMATION

On July 13th, 2017 the Board of Directors of the Company approved the updated version⁵ of the Company's "Internal Dealing Code" (this document is available on the Company website www.isagro.com, in the corporate governance/codes and procedures section), pursuant to article 114, paragraph 7, TUF, to European directives on "Market Abuse" and to the articles set forth in Part III, Title VII, Chapter II of Consob Regulation no. 11971/1999, as subsequently amended (so-called "Issuers' Regulation").

The Internal Dealing Code was introduced with the aim of regulating the disclosure and conduct obligations that must be respected by "relevant parties" and their "closely linked individuals" with regard to all transactions made by them on the listed financial instruments of Isagro S.p.A. in order to improve transparency and informative homogeneity with regard to the market.

During 2017 the Company complied with obligations provided by the Regulation for markets organised and managed by the Italian Stock Exchange in the public disclosure of confidential information via the SDIR-NIS system managed by BIT Market Services S.p.A.. At the same time, for the storage of regulated information, mandatory since 2014, the Company adopted the centralized storage mechanism, called "Info", available at www.computershare.it, managed by Computershare S.p.A., a company authorized by Consob. It is hereby given that, on the approval date of this Report, the Company uses the SDIR-NIS system also for the storage of regulated information.

In accordance with the provisions of criterion 1.C.1. j) of the Corporate Governance Code, at the meeting of December 13th, 2006 the Isagro S.p.A. Board of Directors approved the "Internal regulations for the management and treatment of confidential information and for the external communication of documents and information", updated to its new version at the meeting of August 4th, 2016 (this document is available on the Company website www.isagro.com in the corporate governance/codes and procedures section).

⁵ The first version of the Internal Dealing Code dates back to the document approved by the Board of Directors on October 13th, 2003.

The aim of this Regulation is to define the terms and procedures for the market disclosure of Issuer's price sensitive information and at the same time establish adequate and specific control principles in order to prevent the commission of corporate "Market Abuse" offences.

Moreover, in compliance with article 115-*bis* of the TUF, a "Register of persons with access to price sensitive information" (hereinafter the "Register") was created. Established on October 30th, 2006, this Register lists the names of all persons with occasional or regular access to significant or price sensitive information. The General and Corporate Affairs Managers is responsible for keeping, managing and updating the Register.

The Board has established two internal committees: the "Nomination and Remuneration Committee" and the "Control and Risk Committee".

We highlight that, pursuant to criterion 4.C.1., paragraph c), the Board resolved to establish a single "Nomination and Remuneration Committee", composed of independent directors. This approach is justified by the Company's organisational necessity to group together the duties assigned to committees provided by the Code, in compliance with the rules on their membership, and the need for flexibility, also taking into consideration the size of the Board of Directors.

The functions of the above-mentioned committees are distributed in compliance with the Code.

It should be emphasised that, under the coordination of the Chairman, no responsibility for one or more committees is reserved to the Board of Directors.

Other committees not contemplated in the aforementioned Code have not been established, except for the "Committee of Independent Directors" set up to perform the tasks indicated in the "Procedure for managing transactions with related parties" pursuant to Consob Resolution no. 17221 of March 12th, 2010 and subsequent amendments.

11.0 INTERNAL CONTROL AND RISK MANAGEMENT SYSTEM

Introduction

The internal control and risk management system is a set of rules, procedures and organisational structures that, through an appropriate process of identification, measurement, management and monitoring of the main risks, allow a sound and correct management of the company in a manner consistent with the established goals.

The responsibilities of the internal control and risk management system are assigned to the Board of Directors, which defines the guidelines on the internal control and risk management and periodically verifies the related operations, with the support of the Control and Risk Committee and Internal Audit department.

An effective internal control and risk management system, in fact, contributes to ensuring the safeguarding of corporate assets, the efficiency and effectiveness of corporate transactions, the reliability of financial data and the compliance with laws and regulations. The same system also

contributes to a management of the enterprise coherent with the business goals set by the Board, encouraging taking aware decisions.

Given the characteristics of the company, the Control and Risk Committee and Risk Manager periodically report to the Board, the activity carried out and planned by Internal Audit function and on the basis of assessments performed, the Board of Directors considers the Company's internal control and risk management system is mainly organised so as to ensure correct information and adequate control coverage of all activities and, in particular, the areas at greatest risk and can be relevant for the medium and long term sustainability of the Issuer.

Main characteristics of the existing risk management and internal control system regarding the financial reporting process pursuant to article 123-bis, paragraph 2 b), TUF

The internal control system regarding the financial reporting process aims to identify and assess actions or events, the occurrence or absence of which could compromise the achievement of the reliability, accuracy and promptness objectives of financial reporting.

This system strictly belongs to the Isagro's risk management system, known as the "Internal Control and Risk Management System".

The internal control model on financial reporting adopted by Isagro was presented to the Control and Risk Committee and to the Issuer's Board of Directors and all aspects concerning the principles of control and accuracy of the process are applied to the Group companies.

The Manager responsible for preparing the corporate accounting documents, pursuant to Law 262/2005 (hereinafter the "responsible Manager"), was vested with powers to implement the administrative-accounting procedures that govern the process of drawing up periodical corporate financial disclosures, to monitor the application of the administrative-accounting procedures and, together with the CEO, to release to the market its certificate concerning the financial documentation, meeting the terms of the assertions above-mentioned (reliability, accuracy and promptness).

The design, establishment and maintenance of the system on financial reporting are ensured through the following methodological approach:

- risk assessment and gap analysis;
- identification of controls;
- assessment of the controls and management of the monitoring process.

This process is managed by the aforementioned responsible Manager who, with the support of the Internal Audit department, defines the interventions in terms of process, information systems or procedures to correct any deficiencies of the control system.

The risk assessment activity aims to identify the corporate processes that, due to the impact on financial disclosure with generation of accounting transactions, are important for the purpose of the assessment. This activity is implemented on the basis of a quali-quantitative assessment approach, applying top-down logic, as described below (with particular reference to financial statements and periodic reports):

- analysis of the financial statements for each year (Isagro S.p.A.'s individual and consolidated position);
- identification of the material accounts of the Financial Statements (so-called significant accounts);
- identification of the corporate processes used as input (so-called target processes).

The material accounts of the Financial Statements are identified through a combined analysis of various assessment parameters. These parameters are defined in order to consider the following aspects: materiality of the item in relation to the significance of its value, randomness/variability of the item, criticality/complexity of determining the item, the specific features of the Company and the reference business/sector/environment.

The structure of the financial reporting control system includes two macro types of controls:

- entity controls: these controls apply to the entire company organisation and concern: the assignment of powers in line with the responsibilities assumed within the organisation, the segregation of duties and responsibilities, the communication and staff training system concerning accounting standards and the internal control system on financial reporting, the procedural system aimed at regulating the closing of the Financial Statements and consolidated Financial Statements as well as disclosure of the financial reports and the security of the corporate IT system;
- process controls: these are specific controls for each process, i.e. the setup of manual and system activities aiming to prevent, identify and correct errors that occur during the production of financial reporting; these controls are indicated at a single procedure level, so that each user is informed that failed execution may determine an error or fraud on the drafting process of the Financial Statements and the financial reporting.

The above-mentioned controls, both at entity and process level, are subject to constant assessment in order to guarantee the correct operation of the financial reporting control and identify any deficiencies found in it.

On this regard, the responsible Manager has assigned to each process owners, i.e. the managers of a key process for the purpose of financial reporting, a monitoring task, to be carried out each quarter and in any case when required, by executing tests on important activities (ongoing monitoring activity). At the same time, the responsible Manager has assigned to a third party with respect to the process owners (the Internal Audit department of the Company) the task of carrying out independent monitoring (separate evaluation) based on an activity plan shared with the responsible Manager.

In case of identification of gaps in the issued procedures or of deficiencies at control level, the responsible Manager initiates the risk assessment process again in order to correct the emerging problems.

The outcome of the monitoring activities is reported to the responsible Manager, promptly indicating the operational status of the control system.

11.1 EXECUTIVE DIRECTOR RESPONSIBLE FOR THE INTERNAL CONTROL AND RISK MANAGEMENT SYSTEM

On May 5th, 2015, the Board of Directors of the Issuer, in compliance with criterion 7.P.3., paragraph a) no. The Internal Audit Manager, after hearing the opinion of the Control and Risk Committee, has submitted the “Annual Internal Auditing Plan for 2017” to the Board of Directors on March 1st, 2017.

The activity performed by Internal Audit department in 2017 was consistent with the above approved audit plan. As part of the audit activities carried out, it was also verified the accounting recognition system to improve the reliability of the information technology systems.

The findings of audits conducted by the Internal Audit department on the correctness of management, on risk trends and on the overall functionality of the internal control system are reported by the Manager to all the Company bodies (the Board of Directors' Chairman - also in his role as Executive Director Responsible for the Control and Risk Management System, the Control and Risk Committee and the Board of Statutory Auditors).

In 2017 the Internal Audit Manager attended all meetings held by the Control and Risk Committee and by the Board of Statutory Auditors; she provided support in the identification of the main business risks to the Risk Manager. The Internal Audit Manager also performed activities requested by the Manager responsible for preparing the corporate accounting documents.

We highlight that the Internal Audit department of the Issuer is internal to the Company.

11.3 ORGANISATIONAL MODEL pursuant to Legislative Decree No. 231/2001

In 2006 the Board of Directors of Isagro S.p.A. adopted an Organisational, Management and Control Model pursuant to Italian Legislative Decree 231/2001 (hereinafter also referred to as the “Organisational Model”) and appointed a Supervisory Body.

At the date of this Report, the current Model is the one approved by the Board of Directors on May 16th, 2016. At this regard it is noted that, starting from January 2018, the Company started activities

aimed at risk assessment and update / integration of the Model with reference to the new offences recently introduced in the body of the Decree (so-called "corruption between private parties and incitement to corruption among private individuals", "illicit brokering and exploitation of the works"; new offences concerning illegal immigration and "racism and xenophobia") and the new requirements on whistleblowing.

The Organisational Model, also structured in accordance with Confindustria Guidelines, is composed of a General Section and a Special Section. The General Section briefly covers the contents of Legislative Decree no. 231/2001, defines the Supervisory Body and its assigned powers and functions and also outlines the related information flow and the Disciplinary System adopted by the Company. The Special Section specifically describes the Sensitive Processes and the measures and protocols set up by the Company to prevent the risk of committing offences provided in Legislative Decree no. 231/2001. The Annexes referred to in the text of the document form an integral part of the Organisational Model, particularly the Group Code of Ethics. During the meeting on November 14th, 2016 the Board approved the updated and integrated version of the Group Code of Ethics.

The types of offences included in the Issuer's Organisational Model as at the date of this Report are the following: "*Offences against Public Administration*", "*Corporate and market abuse offences (including private corruption)*", "*Receiving stolen goods, money-laundering, use of illegally gained money, assets and utilities and self-laundering*", "*Occupational Health and Safety offences*", "*Computer crime*", "*Organised crime*", "*Counterfeit of trademarks, patents and logos*", "*Industrial and commercial offences*", "*Copyright offences*", "*Environmental offences*", "*Employment of citizens of third countries whose stay is illegal*".

The task of monitoring the operations and compliance with the Model, and arranging the related updates, is assigned to the Supervisory Body, which was confirmed by the resolutions of the Board of Directors on May 5th, 2015 and September 29th, 2015. The composition of this Board, the three-year term of office of which expires on approval of the Isagro S.p.A. Financial Statements at December 31st, 2017, features a collegial structure to satisfy the independence, autonomy, professionalism and continuity requirements of Legislative Decree no. 231/2001. Its members include two external professionals Renato Colavolpe, covering the role of Chairman, and Antonio Zoncada and the Internal Audit Manager, Laura Trovato.

The Supervisory Body reports directly to the Board of Directors through half-year reports, about the implementation of the Model and any identified critical matters.

We highlight that, in 2013, the Board of Directors considered the opportunity of assigning the Supervisory Body duties to the Board of Statutory Auditors, as provided in article 14, paragraph 12, Italian Law no. 183 of November 12th, 2011, and decided to structure its corporate governance model including both a Supervisory Body and a Board of Statutory Auditors.

The Group Organisational Model (summary version) and the Group Code of Ethics are available on the Company website www.isagro.com in the corporate governance section.

11.4 INDEPENDENT AUDITING FIRM

The Shareholders' Meeting held on April 26th, 2012, after considering the justified proposal made by the Board of Statutory Auditors, appointed Deloitte & Touche S.p.A., with registered office in Milan, to perform the audit of the separate and consolidated Financial Statements of the Company and the limited review of the half-year reports for the period 2012-2020.

On December 20th, 2017, the task of revising the "Non-Financial Statement" for the financial years 2017-2020 was assigned to the Independent Auditing Company, with the positive opinion of the Board of Statutory Auditors.

11.5 MANAGER RESPONSIBLE FOR PREPARING THE CORPORATE ACCOUNTING DOCUMENTS AND OTHER CORPORATE FUNCTIONS

Article 21-*bis* of the Articles of Association assigns powers to the Board of Directors to appoint and terminate the office of a Manager responsible for preparing the corporate accounting documents, subject to the binding opinion of the Board of Statutory Auditors, and vests appropriate powers and resources to this officer to perform the assigned duties in accordance with laws and regulations.

The Manager responsible for preparing the corporate accounting documents shall meet the integrity requirements established by law for members of the Board of Directors, and shall have an overall experience of at least three years in the exercise of administrative and/or accounting and/or financial and/or control activities at the Company and/or at its subsidiaries and/or at other public limited companies.

On May 5th, 2015 Isagro S.p.A.'s Board of Directors, having verified in advance the aforementioned requisites and with favorable opinion of the Board of Statutory Auditors, confirmed Ruggero Gambini - Chief Financial Officer (CFO) of Isagro S.p.A. – as Manager responsible for preparing the corporate accounting documents.

The Manager responsible for preparing the corporate accounting documents was informed and vested with powers enabling performance of such duties and the Board of Directors ensures that he has sufficient powers and means to carry on his tasks. On November 14th, 2016, the Board of Directors, in compliance with law and the Articles of Association, made him available an expense budget for year 2017 totaling € 10,000 (ten thousand).

With regard to managers in other roles and corporate functions associated with internal control and risk management, reference should be made to paragraph 11.6 below.

11.6 COORDINATION BETWEEN PARTIES INVOLVED IN THE INTERNAL CONTROL AND RISK MANAGEMENT SYSTEM

The following parties are involved in the internal control and risk management system:

- the Board of Directors, which performs a guidance and assessment role as regards the adequacy of the system;
- the Executive Director Responsible for the Internal Control and Risk Management System, who arranges its planning, implementation and management, identified in the Company's Chairman and CEO;
- the Control and Risk Committee, with the duty of providing support to the Board of Directors' assessments and decisions relating to the internal control and risk management system;
- the Risk Manager, responsible for the coordination of governing bodies in the risk management process;
- the Internal Audit Manager, as third level control, in charge to verify that the internal control and risk management system is adequate and operates correctly; the Company departments to which second level controls are assigned, with a view to ensuring the monitoring and management of corporate risks;
- the Manager responsible for preparing the corporate accounting documents, who in relation to accounting reports (including interim reports), certifies the correspondence between information disclosed to the market and the documented results, the accounting books and records pursuant to 262 Law;
- Corporate Affairs and Legal Affairs Managers, with reference to the oversight of the legal and non-compliance risk, including the risk of the commission of criminal offenses against or in the interest of the Company;
- the Board of Statutory Auditors, which supervises the effectiveness of the internal control and risk management system;
- the Supervisory Body, vested with all powers to ensure prompt, efficient supervision of the operations and compliance with the Organisational Model adopted by the Company, in accordance with the provisions of article 6, Legislative Decree no. 231/2001.

Coordination among the aforementioned parties enhances the effectiveness and efficiency of the internal control and risk management system in order to reduce activities overlapping.

Such coordination is developed through a continuous exchange of information between the parties both during joint meetings and through the circulation of the minutes prepared by the different bodies.

12.0 DIRECTORS' INTERESTS AND TRANSACTIONS WITH RELATED PARTIES

In compliance with the provisions of article 2391-*bis* of the Italian Civil Code and Consob Regulation no. 17221 of March 12th, 2010, as amended by resolution no. 17389/2010, on March 14th, 2017 the Board of Directors approved the updated version of the "Procedures for managing Transactions with Related Parties", which entered into force on May 2nd, 2017. This Procedure (available on the Company website www.isagro.com, in the corporate governance/codes & procedures section) was approved subject to the previous favourable opinion of the Issuer's independent directors and, in short, provides for transactions with related parties to be resolved subject to the justified, non-binding opinion of a

Committee consisting exclusively of unrelated independent directors.

The Procedure contains the rules for identifying, approving and implementing transactions with related parties as executed by the Company, either directly or through subsidiaries, in order to ensure substantial and transparency and fairness of such transactions.

Pursuant to article 10, paragraph 1 of the Procedure, the Chairman of the Board of Directors issues operating guidelines with the aim of guaranteeing an easy understanding and application by the target recipients of the rules contained in the Procedure, and of identifying the company departments responsible for its management. As of the date of this Report and based on the ownership structure of the Issuer and the type of decisions usually submitted to Board approval, the Board of Directors has not evaluated as necessary the adoption of specific operating solutions to facilitate the identification of situations in which a director has an interest on his own account or on behalf of third parties. In this regard, on March 14th, 2017 the Board has been informed about the update of the implementing rules of the related parties transactions procedures;

We highlight that, for the proper management of transactions with related parties, the Procedure, in addition to the terms of the above-said Consob Regulation no. 17221, has established the following: if a transaction submitted to the Board of Directors is in the interest, even indirectly, of one of the Isagro S.p.A.'s directors, the latter should promptly and fully inform the Board of Directors about the interest (in accordance with article 2391 of the Italian Civil Code) as well as abstain from participating in the resolution. Should the Board of Directors deem appropriate the participation of the involved director in the investigation and resolution phases, the same can enable, after hearing the Board of Statutory Auditors, the participation of the director concerned both in the preliminary stage and in the deliberative stage.

13.0 APPOINTMENT OF STATUTORY AUDITORS

In accordance with article 25 of the Articles of Association, the Board of Statutory Auditors consists of 3 (three) Standing Auditors and 2 (two) substitute auditors, appointed by the Shareholders' Meeting from lists submitted by shareholders. Candidates on lists must be ranked in progressive order for election.

The submission, publication and filing of lists and related documentation (including therein statutory declarations and attestations) are subject to the procedures set forth in article 15 of the Articles of Association (see paragraph 4.1 of this Report), to the extent they are compatible with article 144-*sexies* of Issuers' Consob Regulation, approved by Resolution no. 11971 of May 14th, 1999, as subsequently amended.

Lists may be submitted by as many shareholders as represent, alone or with others, at least 2.5% (two point five per cent) of the share capital, or a different percentage established by Consob⁶. In the event that, at the closing date by the twenty-fifth day prior to the date in which the shareholders should approve the new Statutory Auditors, only one list or only lists presented by shareholders who, according to the paragraph 4, are connected to each other in accordance with Article 144-d, have been filed, lists may be submitted until the third day following that date. In such case, the aforementioned threshold of 2.5% is reduced to half.

Members of the Board of Statutory Auditors are selected among those who possess the requisites of professionalism and integrity as included in the Ministry of Justice's Decree no. 162 dated March 30th, 2000.

In order to ascertain that the requirement of the experience of each candidate is met, for subject matters and sectors of activity strictly associated with those of the Company we refer to those relating to the so-called "conduct-related obligations", i.e. those that guarantee specialised services.

2 (two) standing auditors and 1 (one) substitute auditor shall be taken from the list that has obtained the highest number of votes expressed by shareholders, in accordance with the progressive order in which they are indicated on the list itself. The third standing auditor and the second substitute auditor shall be taken from other lists in accordance with the procedure provided by article 15 b) of the Articles of Association.

The chairmanship of the Board of Statutory Auditors goes to the first candidate of the second list (the third standing auditor) who has obtained the highest number of votes.

Where only one list is submitted, the Shareholders' Meeting shall vote on it; in the event that the list obtains the relative majority, the first 3 (three) candidates indicated in progressive order shall be elected as standing auditors and the fourth and fifth candidates as substitute auditors; the chairmanship of the Board of Statutory Auditors goes to the first candidate of the submitted list. If no list is submitted, the Board of Statutory Auditors and its Chairman shall be elected by the Shareholders' Meeting on the basis of the majority voting requirements set forth in article 14 of the Articles of Association, in compliance with *pro tempore* current regulations on gender balance.

Where a statutory auditor is to be replaced, the substitute auditor belonging to the same list shall be appointed, in compliance with the *pro tempore* current regulations on gender balance.

Where the Chairman of the Board of Statutory Auditors is to be replaced, the other standing auditor, belonging to the same list of the Chairman, shall be appointed. Where replacements cannot be made in this way or where legal procedures apply, a Shareholders' Meeting shall be held to complete the appointment of Board of Statutory Auditors' members, on the basis of the majority voting requirements set forth in article 14 of the Articles of Association, in compliance with the *pro tempore* current regulations on gender balance.

⁶ By Resolution no. 20273 of January 24th, 2018, Consob confirmed the 2.5% threshold.
